

DATA DASH

THE DATA ANALYTICS SPRINT

OVERVIEW

Welcome to Data Dash, the high-energy Data Analytics Sprint powered by Coder's Cup 2025!

Get ready to unleash your Inner Data Ninja as you dive into a thrilling challenge that tests your analytical sharpness, coding skill, and strategic insight.

You won't just code — you'll uncover stories hidden in the data.

Mode of Competition:

Platform: .ipynb Jupyter Notebook (Offline)

Submission: Online Form for Questions/Answers

Team Size: 2–3 Members

Programming Language: Python

Objective

Perform Exploratory Data Analysis (EDA), craft insightful visualizations, and interpret data patterns with clarity and creativity.

COMPETITION FORMAT

The contest has two parts : The Notebook Challenge and The Analytics Form — released together.

You will have 1 hour 30 minutes to complete both.

At the start you'll receive:

- Jupyter Notebook Template (tasks covering analysis, visualizations & calculations)
- Cheat Sheet (dataset details, formulas & helpful Python snippets)
- Submission Form Link

Part 1: Notebook Challenge

You will receive a unique dataset, a Jupyter notebook template and a cheat sheet containing helpful formulas, functions, and coding tips.

Your Task: Build a clean, well-documented Python notebook showcasing strong EDA, insightful visuals, and smart interpretations.

Part 2: Analytics Form

Complete the Analytics Form designed to test your understanding of the dataset and your reasoning behind the analysis.

The form includes:

- YES/NO questions
- MCQs & numeric answers
- Qualitative & open-ended responses

SUBMISSION GUIDELINES

Work on the Notebook and Analytics Form side by side.

You may edit your answers before final submission, but note — **Form Submission is final once made, so review carefully before submitting!**

Submission Requirements:

File Uploads:

- .py or .ipynb file — containing your complete analysis and code
- Up to 5-10 PNG visualization files — showcasing your best charts or insights

File Naming Convention:

- Follow the naming pattern provided in the form

Deadline:

- The form (including all required files) must be submitted within the **1 hour 30 minute** competition window.
 - Late submissions will not be accepted under any circumstances.
- 

RULES

To ensure a fair and ethical competition, please adhere to the following rules:

Do's:

- Ensure originality in your analysis and visualizations.

Don'ts:

- Plagiarism → Immediate disqualification.
- Data Tampering → Do not alter the dataset.
- GPT / External Tools / Phones → Strictly prohibited.
- Public Sharing → Don't share code or findings during the event.
- Final Decisions → Judges' verdict is final.

PREPARATION TIPS

To maximize your chances of success in Data Dash, consider the following tips:

- **Learn:** Practice Pandas, Matplotlib, and Seaborn.
- **Revise:** Brush up key data and stats concepts.
- **Practice:** Try real datasets on Kaggle.
- **Focus:** Extract insights, not just visuals.
- **Understand:** Strengthen logic and basics — mean, median, probability.
- **Be Ready:** Get comfortable with Python and Jupyter Notebook.
- **Stay Sharp:** Stay calm, focused, and positive.

Remember, discipline and focus are key!

CLOSING THOUGHTS

Data Dash is all about how you think with data — not just how you code.

Stay focused, explore with curiosity, and let your visuals tell the story.

Good Luck, Data Ninjas – may the Best Analysts dash to Victory!
